

BACHELOR OF SCIENCE Management Accounting

The Bachelor of Science in Management Accounting (BSMA) is a program that is designed to prepare students to acquire differential advantage through academic training in vital decision making and critical thinking. The training from the program will eventually lead to the attainment of the international certification, "Certified Management Accountant", which will help them achieve demanding but rewarding career options and enable them to become future management leaders. Its primary goal is to produce competent and ethical professional management accountants capable of making a positive contribution over their lifetime to the profession and society in which they work.

The program fosters wealth creation through the innovation of accounting products, services, and systems that could enhance the income generating capabilities of the organization. Moreover, it promotes wealth management by stabilizing organizational resources through sound planning and control procedures. Furthermore, wealth distribution is nurtured through the creation of more employment opportunities, thereby stimulating economic growth by introducing innovative management accounting services as a result of the professional management accountant's advice, mentoring, influence of best practices and advocating fair reporting.
