The Bachelor of Philosophy (BPh) program provides students an opportunity to delve deeper into questions that matter such as the nature of the world we live in, how to live the good life in such a world, what constitutes a just state, how we know and acquire true knowledge, whether God exists or not, and the meaning of art, language, education, science and technology.

The discipline of philosophy enables students to acquire skills in analysis, argument and critical thinking that are relevant to a wide variety of disciplines and professions. It also deepens and broadens their understanding of reality that facilitates a better appraisal of issues culminating in informed decisions and responsible actions.
